DETAILED ACTION

Drawings

1. The drawings filed on 03/30/2001 are acceptable subject to correction of the informalities, the formal drawing is required. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.

Allowable Subject Matter

2. Claims 1-42 are allowed.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 15, 16, 25, and 42, the prior art fails to teach or suggest a method and a system including a DASE set top box for the mass customization of Digital Television broadcasts (DASE digital signals or Digital Television Application Software Environment) through the broadcasting of commercials in the form of software applications, *wherein ad-applications are injected into various sub-streams of the transport stream and received in a dormant state by the client-side set-top box. As when a commercial is to be shown, a broadcaster broadcasts a generic time-stamped trigger to a dispatching application that performs a keyword matching algorithm to decide which ad-application among those received at the receiver is to be executed; and the dispatching application uses the results of the latter comparison to decide which specific dormant ad-application to route to; furthermore, it then converts the generic trigger into a chosen-ad trigger that is routed to the chosen ad-application.* Upon receipt of the chosen-ad trigger, the chosen ad-application executes, thereby displaying an ad customized to the individual viewer's interests

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
